Explore Yale's Engagement in Climate Week NYC!

The Yale community is once again highly engaged in Climate Week NYC, an annual international summit to drive climate action. Check out our Climate Week website to see how Yale is collaborating with other climate leaders throughout the week. These efforts include sessions hosted by Yale Planetary Solutions at the Yale Club of NYC on September 24 and 25.

Registration is currently waitlist-only, but we will add new registrants as space becomes available! [Visit the website.](#)

Share Your Vision for 2050

Describing the kind of future we want to live in is the first step towards making it a reality. By gathering extensive community input and convening university and regional leaders, YPS is guiding the development of a shared and inspiring vision that will help shape the future of planetary solutions work on campus (and in the world!). Regardless of your role at Yale or in the community, we invite you to share your vision for 2050. [Complete our 3-question form.](#)

Community News

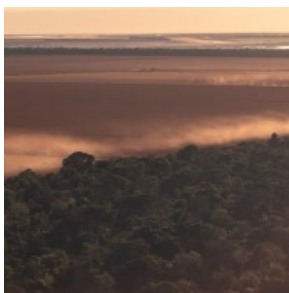

Submit an Event for Celebrate Sustainability

Week

The Office of Sustainability invites you to host an event during Celebrate Sustainability Week, which takes place October 6-10, 2025. This weeklong series of events offers the campus community opportunities to learn, engage, and connect around climate-related topics and to deepen the culture of sustainability at Yale. In past years, events have included panel talks, nature walks, building tours, meditation and yoga, cooking demonstrations, bike rides, clothing swaps, tree planting, and much more. [Submit your event](#) by September 26, 2025.

There is Wide Variation in the Amazon's Response to Degradation and Climate Change

New research by Yale School of the Environment scientists highlights the need to reduce the “hammer” of human impact on the world’s largest rainforest rather than focusing on an all-encompassing climatic tipping point. The analysis by the international team of researchers, published in the *Annual Review of Environment and Resources*, emphasized the impacts of unsustainable land-use on biodiversity, livelihoods, and the global climate.
